WiSE Indoor Hub

The **WiSE** Indoor Hub collects data and supplies it to the **WiSE** Platform where it can be monitored. It can be used in a diverse range of ways to provide intelligent data to your business such as occupancy levels, cleaner complete notifications/KPI's, security coverage and equipment monitoring.

Each **WiSE** Hub can take Bluetooth and hard-wired accessories to expand the range of features on offer.

Key Features

- 24/7 monitoring providing complete peace of mind
- Instant alert should a Hub be activated
- Analyse all data via the online platform
- Remote activation, all Hubs can be set from one location
- Secure, reliable LPWAN radio technology
- Create new revenue streams for your business

Application of the **WiSE** Indoor Hub

Security coverage

Live occupancy data

Equipment monitoring

Contractor monitoring

Staff management and costings

Cleaner complete
