WiSE Smart Module

Managing your business's utility bills and accurately tracking energy consumption can be vital to ensure that your business costs are precisely managed and recouped, as well as identifying any savings.

The **WiSE** Smart Module is a complete metering platform that supports all the daily tasks involved in remote reading of smart meters and daily management of your meter data.

Key Features

- Collect smart energy meter readings
- Use reliable readings to quickly create invoices
- Monitor and notify in the event of power outages
- Analyse business data to identify energy efficiency opportunities
- Improve customer service by providing prompt, accurate bills
- Create new revenue streams for your business

Benefits of the **WiSE** Smart Module

Accurately monitor electricity, water and gas

Automatically create and dispatch invoices

Improve efficiency

Reduce overheads

Easily detect power issues

Analyse data to identify trends

Retro-fit onto existing meters

Eliminate human error
